

EuroDIG Plenary 4: Arrangements for a European IGF and Future EuroDIG events

Finish Responses to questions about national IGF structures

The Ministry for Foreign Affairs is the main responsible government authority on Internet Governance matters. We keep in touch with our IGF stakeholders through e-mails. We do not have an established conference such as IGF, but instead we hold meetings when deemed necessary. We do not limit ourselves to the issues discussed at the IGF but discuss everything related to Internet Governance.

Recently, we set up a Twitter account 'igfsuomi', which is mainly planned to be used as the new communication form of 'established' stakeholders for example at Sharm meeting, but also to spread information to anyone interested and get them to join the discussion. So far, there is no info on the Ministry website, but that will be done before IGF4.

Juuso Moisander, Commercial Secretary, Information Society and ICT, Ministry for Foreign Affairs of Finland
